### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 1 was amended to read

--1. (amended) A biologically pure culture of *Serratia marcescens* B-1231, KCTC 0386BP.--

Authorization for this examiner's amendment was given in a telephone interview with Ms, Dunn-McKay on January 23, 2006.

### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because the claimed strain differs from the known strains in that it produces a specific prodigiosin which has an immunosuppressive activity on CD8 T lymphocytes and CD4 T lymphocytes, both. This immunosuppressive activity is unexpected in that it selectively suppresses the immune response of T lymphocytes.

There would have been no motivation for one of ordinary skill in the art to modify the *Serratia marcescens* strains of the prior art to have the capability of producing a prodigiosin having specific immuno-suppressive properties as claimed.

Strain *Serratia marcescens* B-1231 has been deposited at KCTC under accession number 0386BP (Specification page 7). The deposit requirements are met in application serial No. 09/509118, now U.S. Patent No. 6,645,962 (MPEP 2404.01).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
